Project TDP4HE: Transformative Digital Pedagogies for Higher Education

Work Package 5:

Technical infrastructure for publishing the project results and management of the TDP4HE Open Community of Practice

Programme

Erasmus+

Action Type

KA220-HED - Cooperation
partnerships in higher education

Call

2022-Round 1

Main Results of the Work Package.

LMS Learning Management System
OER Open Educational Resource
OEP Open Educational Practice

Project Website

Access to:

- Relevant information
- Community of Practice
- Virtual Learning Platform

Sept 22 → June 23

Open Community of Practice Platform

Support:

- Practitioners forum.
- Community-driven creation
- Sharing resources and practices
- Maintenance of the project results
- Access to Virtual Learning Platform

Oct 23 → Aug 25

Virtual Learning Platform

LMS for training programme

Virtual Space for OER/OEP

Provides services to:

- Development of training Programs (WP3), OERs and OEPs.
- Access to self-assessment theoretical framework e-Tool (WP2).
- Hosting of OERs and OEPs.
- Support Community of Practice results

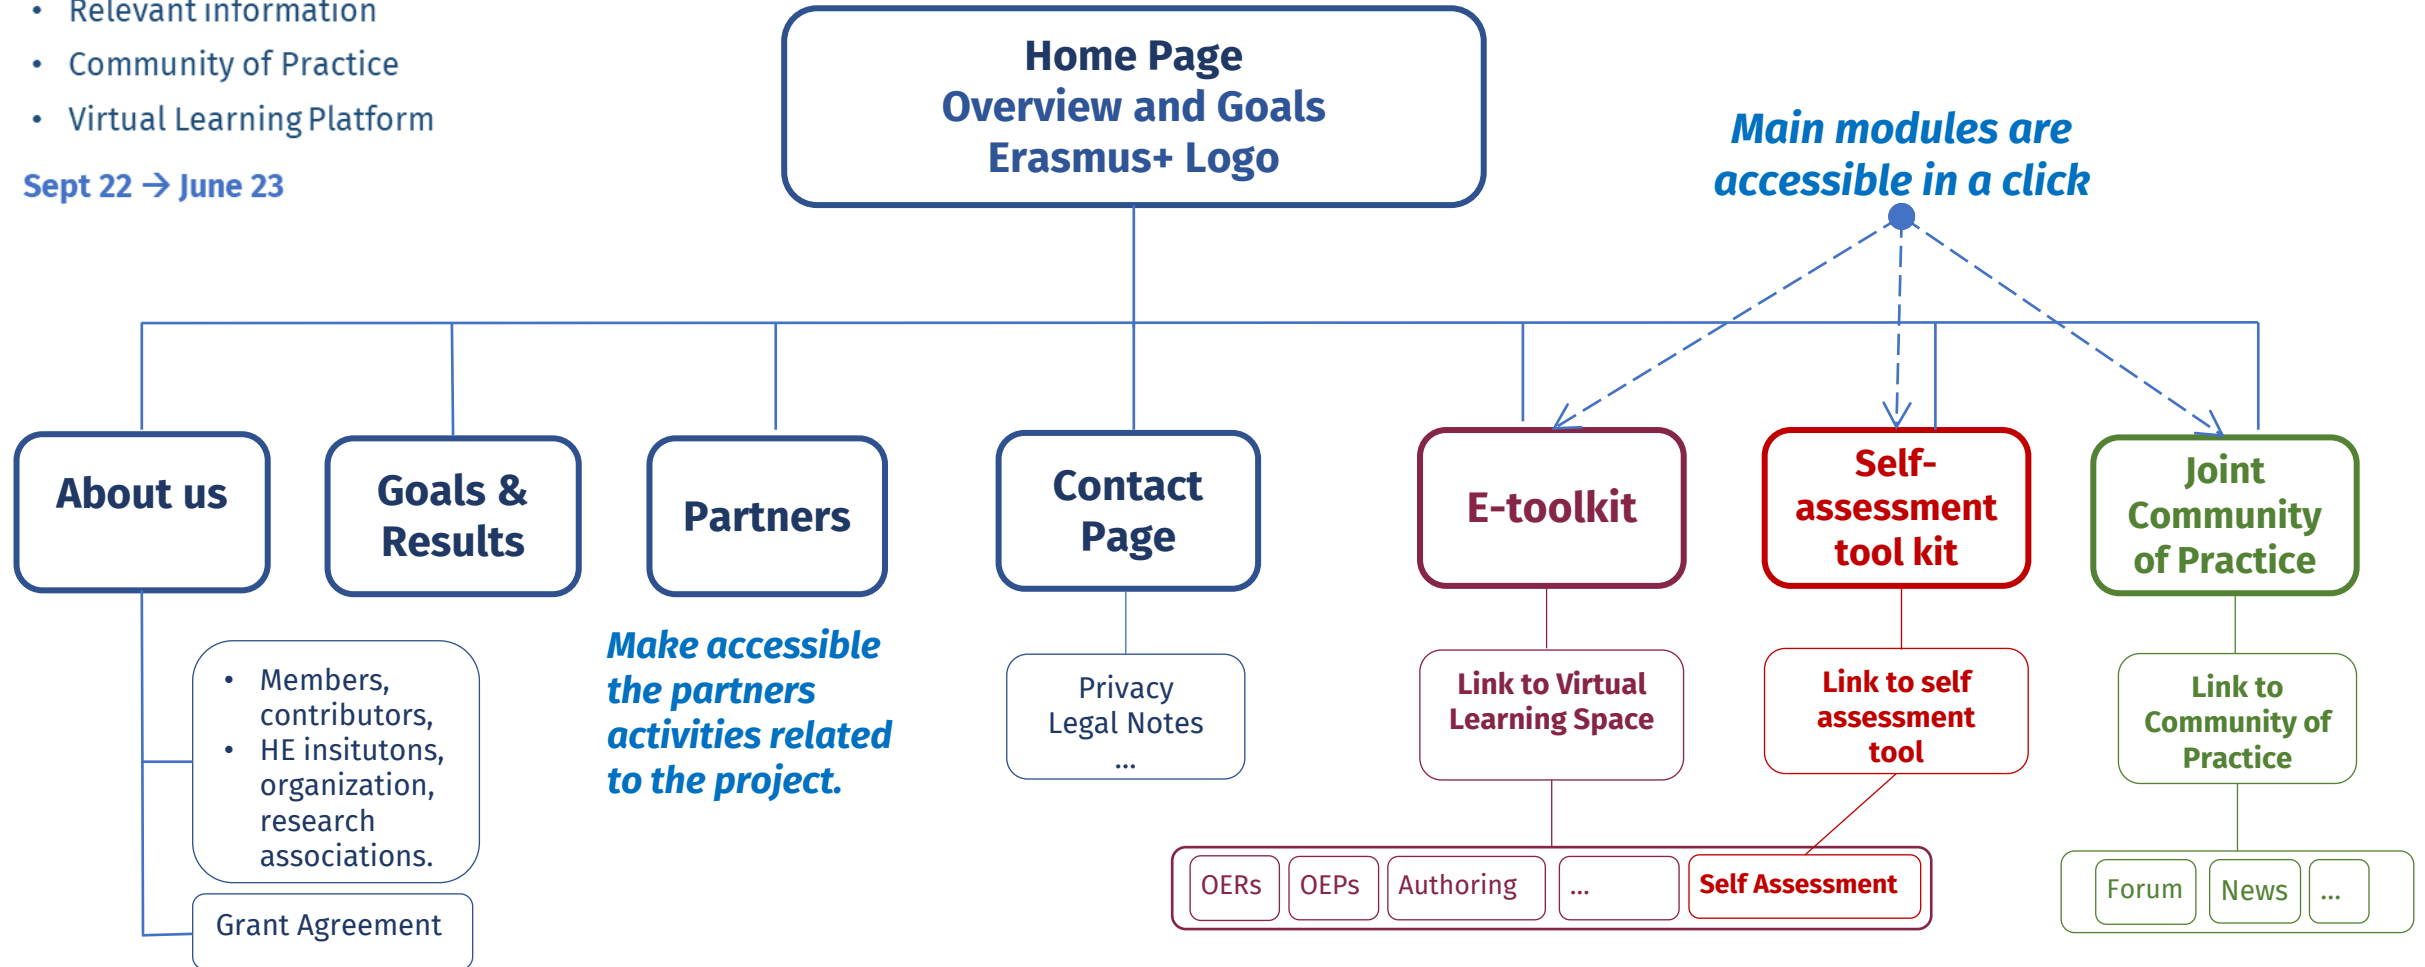

July 23 → Aug 25

Web Page: TDP4HE Site Map

Access to:

- Relevant information
- Community of Practice
- Virtual Learning Platform

Sept 22 → June 23

Project Website

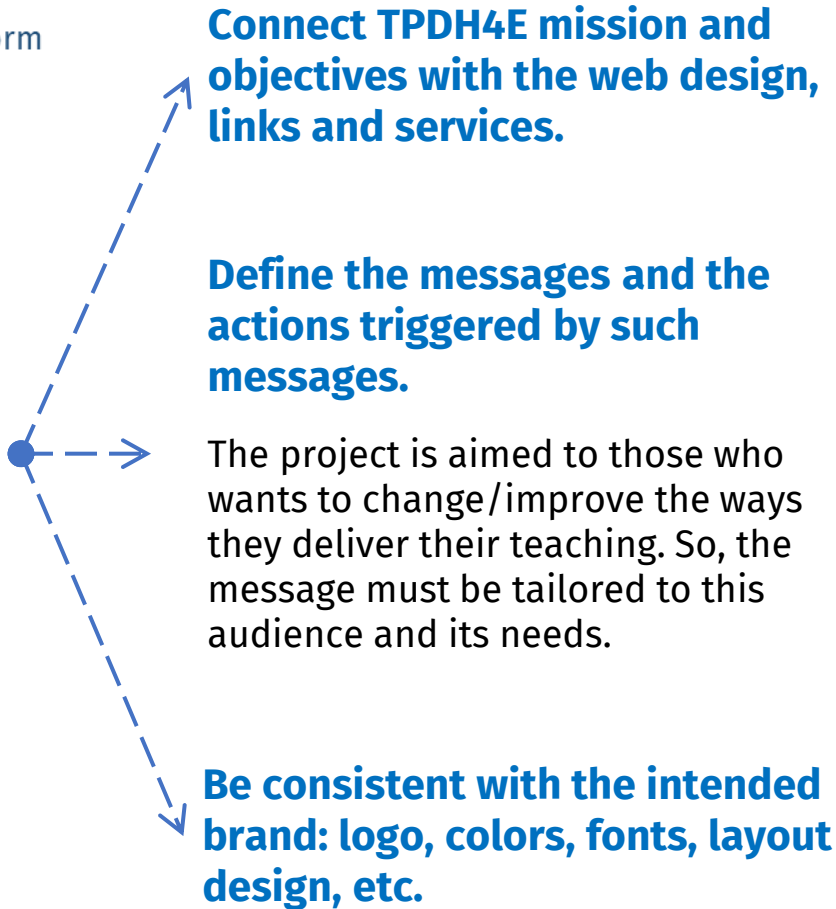

Web Page: TDP4HE Site Map

Access to:

- Relevant information
- Community of Practice
- Virtual Learning Platform

Sept 22 → June 23

Web site is the first and main access to the project, so it is important:

If you join our community of practice, you will be part of a community whose members support each other and you'll find training, feedback, opinion, and services that'll help you be a better teacher

If you get access to our assessment tool you can have an idea of your current skills.

If you get access to our e-toolkit, you will find valuable services and resources to get skilled in new ways to deliver your teaching.

Message: TDP4HE pursuits to create an active community of practice focused on the interchanging of innovative teaching experiences using ICTs.

Action:
Join the platform.

Other issues:

- No technical risk.
- Minimalist approach and then grow as project progresses.
- Related questions:
 - Domain, DNS, Web server, certificates ...
 - On premise vs cloud
 - ...
 - **WordPress?**

Support:

- Practitioners forum.
- Community-driven creation
- Sharing resources and practices
- Maintenance of the project results
- Access to Virtual Learning Platform

Oct 23 → Aug 25

Community of Practice Platform

Options:

- Own development. **Risky option.**
- Minimalist approach, i.e Telegram. **Is it enough?**

CMS, for example **Mahara**. Why Mahara ?

- Programmer skills are not required.
- Free software that is part of the Moodle sphere with ease of creating portfolio pages.
- It is independent of the LMS, so both can be develop separately and then be integrated by means of mutual links.
- Mahara offers an easier interface than Moodle for sharing and presenting resources.
- License free.
- Open to guests - Some pages are accessible like a website and some pages are restricted like Moodle. Users need to be registered.
- When the CMS users want to enter into the LMS, they will have to log in. It will be necessary to authenticate in both systems.

Virtual Learning Platform

Virtual
Space for
OER/OEP

Virtual Learning Platform

Provides services to:

- Development of training Programs (WP3), OERs and OEPs.
- Access to self-assessment theoretical framework e-Tool (WP2).
- Hosting of OERs and OEPs.
- Support Community of Practice results

July 23 → Aug 25

UPCT Indie: LMS + Repository + Authoring Tool

- Virtual space for the newly developed TDP4HE OER and OEP as well as to host OER/OEP developed by teaching academic staff, including self assessment tool.
- Provides an authoring tool to help teachers become authors of enriched digital learning units
- Moodle is not necessary. Requested KPIs can be gotten form Indie.
- Every OER/OEP developed with Indie can be exported as SCORM or as Web Object to be used in any other e-learning platform or web server.
- It is possible to get access to all resources from Community of Practice Platform by means of URLs associated to OERs and OEPs.
- Training is available for both content consumers and content producers (Indie OERs).
- Indie accounts for project members can be created immediately (user name, e-mail, organization, that's all needed). Training materials are available for registered users.

The screenshot displays the INDle Editor interface. On the left, a sidebar contains two sections: 'Elements (6 items)' and 'Layouts (3 items)'. The 'Elements' section includes icons for Text Block, Quote, LaTeX formula, Video, Image, and Table. The 'Layouts' section includes icons for 2 columns and 3 columns. The main workspace is titled 'INDle Editor' and features a top toolbar with buttons for 'Add section', 'Import section', 'Clear content', 'Undo', 'Redo', and 'Save'. The workspace is divided into two tabs. The first tab, 'Tab: Approaches for Learning the Layout', contains a text block with the sentence 'There are two approaches to Learning the Layout.' followed by two bolded section headers: 'Learning the Layout – The Reference or Starting Point Approach' and 'Learning the Layout – The Commonly Used Routes Approach'. The second tab, 'Tab: Applying the Commonly Used Routes Approach to the School Environment – An Exercise for You To Try', contains a text block with the question 'What are the parts of the school used by the child?' followed by a row of four icons: a pencil, a document, a right-pointing arrow, and a red 'X'. A third text block, 'Preparing to familiarise the chi...', is partially visible on the right side of the workspace.
